

Into the City Map 2

PREVIEW BOOKLET

Into the City: Map 2 is a map-pack by Crooked Staff Publishing that depicts the layout of a single fantasy building (split over two large levels), that is suitable for inclusion in most urban settings. What follows is a brief overview of what is contained in this product:

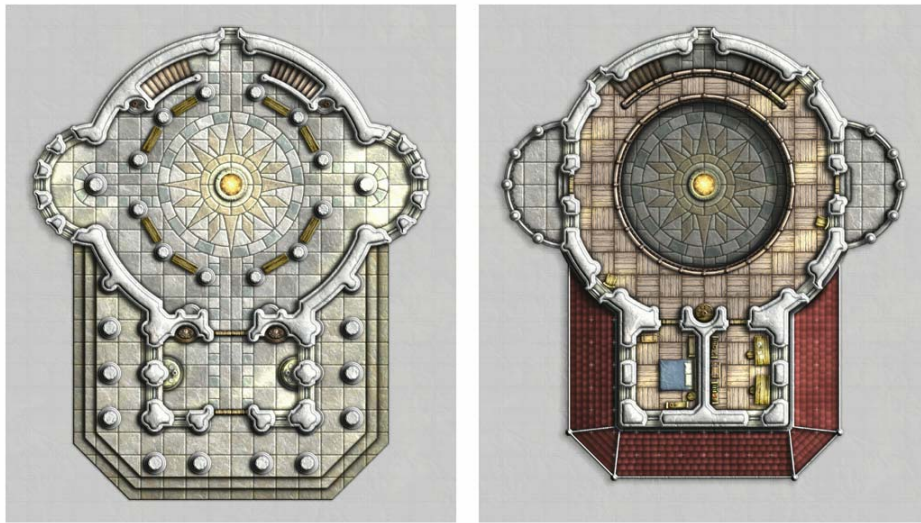

PDF BOOKLET

A pdf booklet that features a labelled version of each level of the building (along with space for the GM to add his/her notes).

JPG IMAGE FILES

Each level of the building is also provided as a jpg image file - making it ideal for use with virtual tabletops (note that these have been scaled at 100 pixels per grid square).

BATTLEMAPS

In addition, both levels of the building have been supplied as multi-page pdfs (scaled at 1" per square) - so that they can also be printed out and used as miniatures scaled battle-mats.
