

Into the Darkness Map 4

PREVIEW BOOKLET

Into the Darkness: Map 4 is a map-pack by Crooked Staff Publishing that depicts a single cavern/dungeon encounter site (which is suitable for inclusion in most fantasy games/settings). Included in this product are the following:

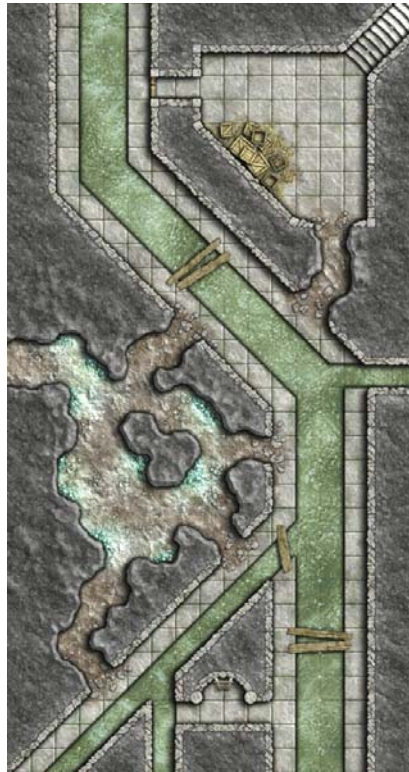

PDF BOOKLET

A pdf booklet that features a labelled version of the map (along with space/additional pages for the GM to add his/her own notes).

JPG IMAGE FILE

The map is also provided as a jpg image file - making it ideal for use with virtual tabletops (note that this image has been scaled at 100 pixels per grid square).

BATTLEMAP

In addition, the map is also supplied as a multi-page pdf file (scaled at 1" per square) - so that it can also be printed out and used with miniatures (note that a printer friendly version of the map is also included - i.e. with a plain background).
